LLOYD GEORGE RESIGNS THE PREMIERSHIP

UNIONISTS WITHDRAW FROM COALITION—BONAR LAW NOW PRIME MINISTER—HOUSE WILL BE DISSOLVED TODAY AND GENERAL ELECTION DATE SET FOR NOV. 15TH

After holding the office of prime minister through years of the most severe years of the British Empire—Lloyd George has resigned the office of prime minister and the office of premier.

The resignation of Lloyd George was announced at 10 o'clock this morning. The resignation was accepted by the king and the government will be dissolved today.

Mr. Lloyd George's resignation was announced at 10 o'clock this morning. The resignation was accepted by the king and the government will be dissolved today.

Mr. Lloyd George's resignation was announced at 10 o'clock this morning. The resignation was accepted by the king and the government will be dissolved today.

Southern Farmers Make Application to Move

More than one hundred farmers from southern Alberta have made application to the Alberta government to move from their present farms to new homesteads in northern Alberta.

Convert Bituminous Coal Into Coke

On the assumption that the converting of bituminous Canadian coal into coke may be a remedial method of extending production of the coal of Canada, the government is considering erection of a plant at Redcliff.

Govt. Should Stop Exodus of Breeding Cattle

SACRIFICE OF SUCH STOCK IS A SHAME—IF PROVINCE DEPLETED WILL PAY DEARLY FOR IT IN FUTURE

That the government should do something toward stopping the wholesale removal of breeding cattle from the province is the opinion of V. M. Carr, Grayson Lake stockman, who has played a game of soccer with them Alberta. Mr. Carr exercises the right of the province to remove from the province any cattle that are found to be diseased.

Mr. Carr says that the removal of breeding cattle from the province is a shame and that the province will pay dearly for it in the future.

Redcliff Wins First Inter-School Game

The first contest in the inter-school sports took place here last Saturday morning, when a school team from the Redcliff school defeated the team from the school team.

Annual Meeting of U. G. G. On Nov. 23

Notice in connection with the annual meeting of the United G. G. of Redcliff, Limited, will be held at the Redcliff school on November 23rd.

Farmers Stand by Saskatchewan Caucus

Declaring that the Progressives are standing in the policy enunciated at the Saskatchewan caucus, the farmers of the province are standing by the caucus.

Govt. Reserves Local Gas Rights For The Town

IS RENEWAL OF RESERVATION MADE SEVERAL YEARS AGO—WILL NOT AFFECT PRESENT GAS NEGOTIATIONS OF LOCAL GAS COMPANY—SIMILAR RESERVATIONS MADE FOR MEDICINE HAT SOME TIME AGO

Reservation of the natural gas rights on crown lands adjacent to the town of Redcliff, for a further period, the terms of which is unspecified, is provided for in an order-in-council just passed. This announcement, which came as a news dispatch from Ottawa last Saturday, has led to the belief that with the present situation in connection with the piping of gas to Calgary.

Redcliff Gas May Not Go to Calgary For Some Time

NEW COMPANY WILL NOT START TO LAY PIPE UNTIL AGREEMENT SIGNED, SEALED AND DELIVERED—THIS IS NOT YET DONE

This morning's Calgary Alberta news item regarding the Redcliff gas for Calgary consumption, this winter seems to be less of a certainty now than it did when the local gas conference was in session. According to H. W. Wood, president of the gas company, the Redcliff gas will not be piped to Calgary for some time.

Mr. Wood declared to discuss any other question relating to the gas. He said that in the choice of a chairman the greatest care should be taken to select a man who was closely in touch with the situation.

Should Get Chairman First Says Woods

No delay should be brooked in the choice of a suitable chairman for the gas company, according to H. W. Wood, president of the United Farmers' Association.

Should Get Chairman First Says Woods

No delay should be brooked in the choice of a suitable chairman for the gas company, according to H. W. Wood, president of the United Farmers' Association.

SAYS ALBERTA THORN IN SIDE T. A. CREAR

REPORT THAT MANITOBA LOCAL COUNCIL HELD UPON HIM TO RESIGN—SAY CREAR STRONG FOR ALLIANCE WITH LIBERALS

That Alberta is the thorn in the side of T. A. Crear, who may prick him to such extent that he will resign, or that a split will be brought about in the Manitoba local council, is the opinion of Winnipeg, according to H. W. Wood, president of the United Farmers' Association.

Council Appoints Committee To Look After Gas Interests

At the regular meeting of the Town Council held last night, a committee was appointed to look after the gas interests of the town. The committee will be made up of Messrs. Mayor, Aldermen, and Councillors.

THE REDCLIFF REVIEW, THURSDAY, OCT. 26, 1922.

NEWS' VOLTE FACE

In an editorial last Thursday the Medicine Hat News attempts to blame the present gas situation on Premier Greenfield, and his government at Edmonton. The article in question is headed "Government Volte Face."

In view of the fact that in its issue of the day previous the News placed the blame on their own city council, this heading might well be applied to the News' editorial columns.

It may be a coincidence that in the same issue in which the editorial appears, is a letter from Mayor Huckleval, in which Mr. Huckleval says: "The government has taken the stand that it cannot stop anyone who has something to say from disposing of it to a willing buyer." In an interview printed in the Calgary Alberta on the same day, Mayor Huckleval is reported to have said: "We have no right to have no legal rights to prevent the exportation of gas from the Redcliff field."

Does the Medicine Hat News, then, want the Provincial government to do something which the mayor of that town city says they have no legal right to do?

In his letter in the News Mayor Huckleval also says the policy which the government has announced is only following legislation which was passed in the session of 1911-12.

The government which was in power at that time was one which the News stubbornly supported in season and out of season.

As a matter of fact we have reasons to believe that the present government at Edmonton did everything that was humanly possible to delay definite action until such time as Medicine Hat was prepared to take such steps as were outlined to members of the government by representatives of that city.

In view of these circumstances it would appear to us as though the News were nearer right when it placed the blame on their own city council, than in their

endeavor to blame present conditions on the Greenfield government.

However much we may regret the present situation there is no need for being unfair or unreasonable.

EVIDENCE OF GROWTH

Another evidence of the rapid growth of this province may be gleaned from the fact that as a result of the last census Alberta will be entitled to four additional seats in the Federal House after the next redistribution.

Old timers in this district can well remember the days of Nicholas F. Davin, when the constituency of which we were then a part extended from Regina in the east to take in the present coal mining towns on the Crow's Nest in the west and from the international boundary to as far north as there was habitation. At that time this vast area was very sparsely settled, but today conditions are different. These old timers will look upon the present federal constituency as small in comparison, yet as it now exists it is still one of the largest in the Dominion, and because of its geographical layout out is one of the most cumbersome for any member to cover and represent satisfactorily to all concerned.

For these reasons it is only fair to assume that it will be altered and condensed by the next redistribution bill, and there is little doubt but that one of the additional members for this province will represent at last part of this constituency as it exists at present.

There is a general feeling that when the change is made the Red River will form the northern boundary of one of the new constituencies.

FOR BOYS AND GIRLS

It is the intention of The Review to try to have an editorial for our boys and girls each week, and we trust they will be of interest to that class of our readers.

This week it will be on sports.

and now that a schedule of inter-school sports has been arranged we feel that this subject will be appropriate.

Since organized and supervised play, which comprises all kinds of athletic sports for both boys and girls, is considered of enough importance by our educational departments to demand a place in our curriculum, then surely it should be a branch in which all our school pupils should take a good wholesome interest.

If sports are to have the effect on the characters of our children which it is intended they should have, the first requisite is that both contestants and spectators be good sports. By this we mean they should be fair, clean, reasonable and appreciative. Fair in that no advantage will be taken of a point that was not won honestly and in compliance with the rules of the game, even though it meant the winning of the contest. Clean in play, thoughts and words. Reasonable in not exaggerating an opponent's weaknesses or misfortunes and appreciative by applauding and giving an opponent credit for whatever successes he may achieve. A zealous attention to these principles in sport cannot but play an important part in moulding the characters of those who in a few years hence will be engaged in the larger field of activities.

These inter-school contests open up avenues for training in other lines. When representatives from one school visit another school each will have an opportunity of learning how to act both as hosts and guests. As hosts they should exert every energy in trying to make the visit of their guests as pleasant and comfortable as possible, and as guests they should show their appreciation of such efforts.

Boys and girls of today have a great many more opportunities than did their fathers and mothers. It is hoped they will realize this and take advantage of them.

PROGRESSIVE LEADERSHIP.

Judging from persistent reports which have been afloat lately as well as from speeches from Progressive members of parliament an dreadful pessimism is being spread by U.P.A. locals, there is no little doubt but that a movement is on foot to have a show-down regarding the Dominion leadership of the Progressive party.

That Mr. Crerar and file as well as several leaders of the party, are not satisfied with the leadership of Mr. Crerar under existing conditions, is quite evident, and that they want some definite understanding is quite natural.

The main objection to the leadership of Mr. Crerar appears to be his association with the United Grain Growers, of which company he is the president. It is almost assumed that he must give up either his position as head of the U.G.G. or the leadership of the party.

It is hoped they will realize this and take advantage of them.

ests of the town in connection with any further development in the gas controversy. We are informed that the council still has some hopes of preventing the gas from being piped out of this field. For obvious reasons we deem it unwise at this time to go into details as to why the council contemplates taking. Suffice it to say that the council feels justified in taking further action and that they still have hopes of being successful in their contentions.

Since Lomer Gouin has stated that he is opposed to a fusion of the Liberals and Progressives, it is a safe bet that such a fusion will never come about. Lomer has a habit of getting his own way at Ottawa these days.

Railway News

St. Stephen, N.B. - Accidents through carelessness on the part of automobile drivers are continuing to be frequent. King Street Crossing, St. Stephen, an auto ran into the side of a Canadian Pacific engine, damaging the auto and throwing the occupants out of the street. The driver claimed that he did not see the train until he was within ten feet and could not stop time to avoid the accident.

Toronto, At 1:12 p.m., on September 25, 1922, a Ford coupe ran into the side of a Canadian Pacific freight train, at the crossing of East Street, Toronto, breaking front fender, lamp, axle and wheel of the motor car. The engine was moving very slowly at the time. The driver admitted his responsibility in connection with the accident.

Woodstock, Ontario - Going at a fast rate in his automobile, and finding himself almost in the track of a Canadian Pacific train, Frank Lancaster, of East Sore, Ontario, wisely chose running into a ditch rather than running into the train. He was approaching the C. P. R. crossing and did not notice the train until he was nearly on the crossing. The brakes refused to work and he turned the car into the ditch. The auto upset and was badly smashed, but Mr. and Mrs. Lancaster escaped injury.

Vancouver, B.C. - Tourist traffic during the past summer has exceeded our most sanguine expectations, said Mr. C. E. E. Unsworth, manager of the Canadian Pacific Railway, who has the car load book as a ground record for laying plans for next year's business.

The feature this year, said Mr. Unsworth, has been the large volume of business done in June so far in September, two months which are usually more or less slack.

Kamloops, B.C. - Old-timers say that never did the C. P. R. gardens bloom so bravely or colorfully as this year. And surely they seemed to look quite so lovely with their riot of shades, vivid scarlets and unbelievable blues vying in every bloom. It is visitors, however, who are most impressed, residents even getting used to such beauty, and between trains, many compliments are paid those whose handiwork brings about such a perfection of blossoms.

Victoria, B.C. - Railway building the interior of British Columbia is being held up by lack of labor, according to D. C. Coleman, vice-president of the Canadian Pacific Railway Company. Mr. Coleman announced that his company could secure only a handful of men to push the Seattle Valley line south from Penticton to the new town of Oliver. While it had been planned to complete the line to Oliver in August, this had been found impossible owing to the scarcity of laborers for the proposed undertaking. The line would be finished this fall, and probably in September, he said. The grade has been completed up to Oliver, but the laying of tracks is being completed by the end of the month, he said.

Seattle, Wash. - A grain wharf that was to be 40,000 bushels larger than the one of 1921, said the Vice-President.

Vancouver, B.C. - Without actual figures, a close estimate of the number of tourists who have passed through this city during the past months can hardly be formed. Yet, from information received from both Canadian Pacific Railway and White Pass & Yukon Express, it is certain that travel to and from this part and Seattle, has been better than for several years, and perhaps since several years have been the same.

Every trip of the steamers "Princess Louisa" and "Princess Alice" which ply between this port and Skagway, has found the accommodations on the vessels when they are up and the indications are that for several trips the heavy travel will continue. Tourists and sportsmen have been flocking to the coast since the summer, while the mining developments which have been extensive this summer, have induced many mining men to move northwards.

Service Unavailable - The addition of the "Louisa" to the Alaska service this year was established. Both the "Louisa" and "Alice" are palatial, speedy and commodious craft and also are not a single returning from the north but only speaks in flowing terms of the splendid equipment of the company.

Judging from what has been going on in Manitoba the last few weeks it is hard to understand why reports from Winnipeg should insinuate that Alberta is the thorn in the side of T. A. Crerar.

Customs and excise revenue received during September this year, showed an increase of \$4,712,256 over the corresponding month of last year.

The first Canadian wheat ever shipped to the mills at Shanghai, China, has just left. The consignment consisted of 3,000 tons.

More grain is being shipped from

Alberta farm to the Pacific Coast this year than last, the Dominion grain inspectors announce. Most of the grain is of the finest quality. Only Number 1 hard and No. 1 Northern is accepted at Vancouver.

The largest field of corn in Western Canada, and possibly in the Dominion, is owned by John H. Smith of Maple Creek, and consists of 125 acres of corn in a solid block. The crop is in excellent shape and is estimated to contain 1,000 tons of green corn.

Negotiations for a new trade treaty between France and Canada are to be resumed in Paris by Hon. W. S. Fielding, this week.

Help The New Immigrant

In announcing Canada's new immigration and land settlement policy, Hon. Charles Stewart, Minister of Immigration and Colonization, made it plain that the cardinal features of that policy would be (1) careful selection of immigrants in country of origin, and (2) wise direction after settling in Canada.

The importance of these two things can hardly be overestimated. In the past Canada has lost tens of thousands of immigrants who, after coming to this country, have drifted away to the United States or returned to the land from which they came. The reason is not far to seek. Many of the first place were not of a type or class at all likely to succeed in this country. Others, and probably a much larger number, became discouraged because, through lack of knowledge and "wise direction" they made fatal mistakes, resulting in loss and untimely failure.

Careful selection of immigrants in the country of origin will operate to prevent men and women wholly untrained by previous environment and training from succeeding in a new country like Canada from ever embarking on such a venture. For example, it is but inviting failure to send a man to Canada who all his life has followed, say, the occupation of silk weaving. He knows nothing of working on the land itself, are the type having the best possible chance of making a success in Canada.

But even more important than careful selection is the provision of wise direction after they have arrived in Canada. Many men and women having the qualities necessary to success have failed because of wrong direction, or no direction at all. They have become road pigs in square holes. Some have unfortunately located on land which was not suitable for agricultural operations. Failing where success was practically impossible they have left the country, whereas had wise direction been provided they would have been advised and assisted to locate elsewhere in Canada where success would have attended their efforts.

Therefore, the plan now proposed of keeping close check on every incoming immigrant and assisting him to get properly placed and with advice and practical help when needed like him every period of discouragement and seeming, though only temporary, failure, appears to offer the best possible chance of peopling our vast lands with men and women who will win out and make a real success in Canada.

Such a plan, to succeed must have the cordial support of individuals all over the country, and the plan formulated of creating local community clubs to care for and assist incoming settlers, thus building up a great national welfare organization, is good.

Coupled with this is the other, and sensible plan, of placing these new settlers on lands fairly close to existing lines of railway but which they can be held by speculators and absentee owners. These lands, it is proposed, to have listed and sold upon long terms of payment, involving only a small advance payment of principal and interest upon the amortized plan. Settlers so placed will have a much better chance to succeed than those placed scores of miles from any available means of transportation, or located in "colonies" off by themselves.

People now resident in the districts where these new settlers are to be placed should be ready to help them, because by their presence local taxation will be reduced and modern services and utilities now denied to them because of prohibitive cost will be made accessible. Placing these people with free access of existing railways will operate to wipe out the present staggering debt on our National Railways, and in many ways this proposed more intensive settlement will make for success all round where the old policy of scattering people far apart over immense areas resulted so frequently in discouragement and failure.

For Lease of School Lands

Amendments to the regulations governing the Minister of the Interior power to lease vacant and available school lands in the western provinces for recreational and exhibition purposes have been approved by the public. The previous regulations, it was held by the Department of Justice, did not provide the Minister with sufficient power in the granting of leases for the above mentioned purposes.

Edmonton Band To Tour States

The Edmonton Great War Veterans' Association military band will leave for the United States on a tour of the United States.

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and doses worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—also bottles of 24 and 100—dissolve, Aspirin is the only true Aspirin. It is the only Aspirin that is pure and free from adulteration. It is the only Aspirin that is pure and free from adulteration. It is the only Aspirin that is pure and free from adulteration.

New Building Material

Europe Using Discarded Shell Boxes Filled With Cement

Europe is trying something new and unique in building materials in connection with the battle reconstruction movement in the battlefront districts. It is converting the boxes in which shells were transported to the front into building blocks. The boxes are filled with cement allowed to dry and then assembled like hollow bricks. The boxes are sold to form walls of great strength. In the present shortage of brick the cement filled shell boxes not only comprise a very acceptable substitute but greatly reduce construction costs.

DO YOU FEEL LIKE THIS WHEN YOU WAKEN?

Do you feel blue, sickly, heavy, too tired to get up? If so, it's probably your liver is slow, and needs to be toned and stimulated by Dr. Hamilton's Pills. They will make in a few days the old shrew line new. They will make you feel like a new man. They will make you feel like a new man. They will make you feel like a new man.

Hungarian Lake is Drying Up

Volcanic Changes in Bad-Responsible Bay Geologists

The biggest lake in Hungary, Lake Balaton, once over 100 miles long, would appear slowly to be drying up. In some places the water has receded 100 feet from the old shore line and in a few years and the shrinking continues.

KEEP CHILDREN HEALTHY

To keep children healthy the bowels must be kept regular and the stomach sweet. Nineteenth of the ailments which afflict children are due to derangements of the bowels and stomach. Mycogen's Own Tablets is a medicine that will cure the baby or growing child from the first day of a disordered condition of the bowels or stomach. They are mild but thorough laxative and never fail to give results. Concerning them Mrs. W. B. Colquhoun, States: "I have used Mycogen's Own Tablets for my children. I have found them the best medicine I have ever used for my children. I have found them the best medicine I have ever used for my children. I have found them the best medicine I have ever used for my children."

Pictures in the Album

Collection of Old Photographs Always Full of Interest

A local photographer with many years' experience estimates that only five per cent. of the people who have their photographs taken, do not include them to photographs that are of interest to the people. He found these snapshots which young persons are always taking whether the subject's face is in it shape to be photographed or not.

At one time it was almost a duty to go to a "gallery" for a sitting, have a dozen portraits made in the cabinet size, and send one to each of your uncles and aunts and other relatives who on receiving them placed them in the large family album; where they repose for all time.

It is always worth while looking into one of these old albums. Some of the weirdest looking persons are attainable may be seen looking out at you as you turn the heavy pages. Men of twenty or thirty or forty years ago wearing little hard felt hats that do not seem half large enough to cover their heads they cover, and women, some of the most extraordinary types. They actually used to dress like angels. Believe it or not, they pleased the eye of the male just as much as they do now.

One should stop occasionally, and consider that in a few more years our general appearance will be as strange and outlandish to a new generation as these old photographs appear to us. We have to admit that the older folks "never minding" then, if they did not know how to dress. Let us hope that our successors will take as kindly an attitude toward us—Regina Daily Post.

How Times Do Change
The Walkerton Telegram reports an article from a Walkerton paper printed fifteen years ago urging the various to please give their views to Parliament to use its vote and influence in favor of a law prohibiting the adulteration from using the public highways—Kincardine Review.

Mine's Lintment used by Physicians

The Coming of Better Times

Says Canada's Prosperity Depends on Development in West

Canada's prosperity will rest almost entirely on the development of the west, and the Federal Government, through immigration and the improvement of national terminal facilities, is determined to bring about that development. Hon. J. H. King, Minister of Public Works, and British Columbia representative in the Federal Cabinet, declared at Victoria recently.

CATARHIAL DEAFNESS

A Vindictive Peace

General Hamilton Has Theory as to Cause of Unrest

General Hamilton has asked an interesting question. "Why is it," he asked, "that the two last successful wars, one against the Boers in South Africa and the other against the Germans, had such opposite results? How is it that the Boer war put an end to the Boer republics, bankruptcies, disorders and bloodshed had paralyzed South African progress for a generation, while the great war, on the contrary, has led to re-education, bankruptcy and murder over the best part of the world, from Ireland to the Near East, and turned Central Europe into a seething caldron of hate?"

And the General has answered his own question, which was propounded at the recent unveiling of a war memorial. "It is because our politicians entirely ignore the ideals of those to whom we have raised war memorials by making a vindictive kind of general peace," he said.

"This is not the place to set forth what I think of the Versailles Peace," the General continued. "I can say that in spite of it, the cause of peace is yet not lost if only one will give it a moment's thought. The intentions of those boys to whom this beautiful memorial has been raised, than upon the acts which have frustrated those intentions."

But it is in far Lane Back—a little public with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissue and bring speedy relief. Try it and be convinced. As the latest shift in the pain comes out and there are ample grounds for saying that it is an excellent article.

The feminine vanity bottle was used thousands of years ago. Several estimated to be 2,000 years old have been found with fragments of Egyptian women of antiquity. The Egyptian people held skin, a preparation of red powdered antimony with which Egyptian women of fashion darkened their eyelids and pencilled their eyebrows.

Canadianizing Canada

The Value of Tourist Travel to the Dominion

Travel is one of the greatest elements in education and is one of the fundamentals of good citizenship. The desire to know one's own country is so incited into the system of every Canadian and to obtain any adequate knowledge, how can it be acquired better than by travel? "Canadianizing Canada," and "See Canada First," etc., have been adopted as slogans in the endeavor to create in the minds of Canadians the advantages of national travel and the attractions Canada has to offer.

The purpose of this article is not only to give expression to the importance of Canadians seeing Canada that they may have a fuller appreciation of what their own country has to offer them in the way of scenery and interest, but to emphasize particularly the value of tourist travel to the nation, and the duty we owe ourselves in developing our tourist territory—so to speak—to make the most of it. There is no other country in the world gives up to its people a greater area of country for recreation purposes and these great playgrounds are not confined to any particular section but are spread from the Atlantic to the Pacific. Then again from the seashore resorts of the Atlantic and the Lower St. Lawrence to the Pacific Coast the scenery is so varied and so diversified by different from one another that a Canadian people may use their vacation for years and find new scenery and new interest annually. From the quiet beauty of the Maritimes Province to the rugged scenery of the St. Lawrence of Quebec, the almost continuous lake and river country of the Great Lakes, the Rocky Mountains so immense, beautiful and wonderful, on to the Pacific Coast, one cannot imagine without personal knowledge and knowledge what a wonderful asset we have in our widespread playgrounds and national parks.

But to make the most of these wonderful heritages, to realize the full amount of profit, they must be developed. The Provincial and Dominion Governments must be keenly alive to what the possibilities are. Good roads to the wonderful places and beauty spots are essential to that the way of the tourist may be made easy and attractive.

Much has been done by the railways to advertise our tourist territory, which has resulted in millions of dollars being spent in Canada, principally by our neighbors to the south of us, but the fringe has as yet been scarcely touched. The Canadian National Railways have just opened Jasper Park Lodge, in Jasper Park, the largest and most wonderful of all our national parks, 4,000 square miles of magnificent mountain scenery. There will be rooms unexcelled and thousands of tourists from all over the globe will gladly assemble annually when the park is fully developed. The tourist trade is already open on June 15th last are extended throughout the year. Jasper Park, but one of the many feature places to be developed. Mount Robson Park, just fifty miles west from Jasper station, is another wonderful place. The Robson being the highest peak in the Canadian Rockies, 12,000 feet), the mountain is a striking feature. The loss of British Columbia, is an Alpine kingdom in itself, but until such time as it is developed, the glory and majesty of its scenery is denied the tourist who does not choose to ride a canyon.

By way of comparison it has been stated that tourist traffic in California alone net approximately a hundred million dollars a year and the more Northern Pacific Coast States, Washington and Oregon, add fully half that amount to the total, whereas in Canada it is estimated that tourist traffic in Canada last year did not net beyond ten or twelve millions.

Again, the provinces of Nova Scotia and New Brunswick have all the advantages of the States of Maine, but comparatively little has been done to develop them. What this development may mean in a measure can be expressed by the fact that Maine last year reported a harvest of over \$40,000,000 in tourist business.

Our wonderful tourist territory is undoubtedly one of our largest assets, and greatest heritages to be developed, and the opinion of interested travellers who have visited us, Canada possesses the finest aggregation of scenery in the world. —Toronto Star under Right.

Practice Makes Perfect
Our wonderful tourist territory is undoubtedly one of our largest assets, and greatest heritages to be developed, and the opinion of interested travellers who have visited us, Canada possesses the finest aggregation of scenery in the world. —Toronto Star under Right.

Again, the provinces of Nova Scotia and New Brunswick have all the advantages of the States of Maine, but comparatively little has been done to develop them. What this development may mean in a measure can be expressed by the fact that Maine last year reported a harvest of over \$40,000,000 in tourist business.

Our wonderful tourist territory is undoubtedly one of our largest assets, and greatest heritages to be developed, and the opinion of interested travellers who have visited us, Canada possesses the finest aggregation of scenery in the world. —Toronto Star under Right.

Practice Makes Perfect
Our wonderful tourist territory is undoubtedly one of our largest assets, and greatest heritages to be developed, and the opinion of interested travellers who have visited us, Canada possesses the finest aggregation of scenery in the world. —Toronto Star under Right.

Says Tancle Is Fine To Build Up Weight

Persons suffering from stomach trouble and who are under weight find an ever-ready friend in Tancle. This celebrated medicine has ended hunger and increased the weight for thousands of people everywhere. Mrs. M. Wansinger, wife of a well-known judge, says: "I am 50, and I have lost 100 lbs. in the last 10 years. I just wanted to eat, for my food would sour and keep me in misery for hours. I gained five pounds and look better and feel better than I have in years."

Under nourishment is the cause of most cases of under weight. Tancle enables the stomach to extract the healthy nutriment from the food, build up the whole body and increase the weight to normal. Millions of people have testified to its great benefits in a bottle today at any good drugist.

The Fear of War

Lord Robert Cecil Discusses Conditions in Troubled Europe

"When we come to analyze the situation in Europe, the fear of war is the beginning of wisdom," said Lord Robert Cecil recently discussing conditions in Europe. His apprehensions have been translated into vast armies withdrawn from reproductive work, ill-fed, ill-clothed, and in a state of general demoralization. A greater menace to their friends or fellow-citizens than to their enemies. France is the only country that has fed to the establishment of those armies of occupation on the Rhine that are now a million pounds a week—more than two thousand million marks.

"Fear of war is leading a section of public opinion in Germany to demand a vastly increased air service, and still further concentration upon scientific methods of warfare. In all directions we find that knowledge is still harnessed to destruction; that the scientific method is being used to invent something that can destroy life-energy faster than nature can replace it. Behind all these manifestations lies the fear of war."

It will prevent Unrest Throughout
At the first indications of unrest, which presages disruption and inflammation of the German people, the "Thomas" Electric Oil, a little quantity of this oil, applied to all directions will allow the agitation and prevent the same from becoming a serious one. These who were periodically subject to gushes have thus made themselves immune to attack.

Company U. S. Is In

The list of absentees among the supporters of the League of Nations is more easily called than the roll of its members. The list includes, among others, Ecuador, Germany, Hungary, Iceland, Mexico, Russia, Turkey and the United States—Raymond B. Fiedick in the Atlantic.

In the government of their Dutch Indian possessions the Dutch have a law which provides that the testimony of one white man will be equal to that of seven natives.

The world's nut trees are said to be capable of supplying nourishment to its entire population.

MOTHER SAYS DAUGHTER'S HEALTH

Lydia E. Pinkham's Vegetable Compound Helped Both Mother and Daughter

Lydia E. Pinkham, a woman of 50, says: "My mother had taken Lydia E. Pinkham's Vegetable Compound and when I needed something for my periods, I took it and got good results. I recommend it to women with any female troubles and I know other women who have been benefited by it. I do the same."—Mrs. M. H. Huxton, Lunenburg, N.S.

Many cases like this come to our attention. Lydia E. Pinkham's Vegetable Compound is often recommended by the mother and the mother-in-law, for when it fails it has been helping women for nearly fifty years.

Women Tell Each Other

There are few women who do not know the value of this compound. It is a woman's best friend. It is a woman's best friend. It is a woman's best friend. It is a woman's best friend. It is a woman's best friend.

Good Country Roads Have A Direct Bearing On Our National Prosperity

The difference between national progress and retrogression may be justly summed up in factors of agriculture, transportation, and the maintenance of good roads is a matter which demands the unwavering attention of a modern country in no matter what direction it is making a bid to advance. National prosperity lies in a network of "comfortable, easily travelled roads, and a country ranks among progressive nations according to its convenience in accessibility and marketing.

The construction and maintenance of roads in Canada constitutes a problem that is peculiarly difficult. Canada is a land of tremendous area and small scattered population. To adequately take care of the needs of the country a network of roads is required which would be sufficient to render the same efficient service to a people many times as numerous. Upon a family of four persons in Canada rests the enormous responsibility of building and maintaining one mile of roadway and upon five average families the construction and maintenance of a mile of main highway.

Again, the peculiarity of Canadian conditions creates the necessity for the maintenance of the roads by various methods of travel. Whilst the older settled cities and towns and the areas about them are most modern in respect and their lines of communication up to date as engineering can afford, there are still districts that have recently emerged from the pioneering stages, and still other districts that are only being opened up by colonization and that must be served by roads of some kind.

The prime consideration in road building in Canada, is possibly to enable the farmer to reach the markets with his product as conveniently and economically as possible, and the first consideration in the drawing up of national programmes. A second requirement is to maintain good means of communication between the larger centres and to adequately serve and further encourage motor tourist traffic, which is rapidly increasing every year and has become a not insignificant asset in Dominion revenue. Each year the increase in the automobile and cultivation of farm lands makes necessary the penetration of new colonization areas, which can only be effected by the construction of roads which will permit new settlers to get into them with the least degree of trouble and expense.

Canada is rapidly gaining a reputation abroad for good roads, consequent upon a Dominion-wide co-ordinated effort, due to the foresight of Dominion and Provincial governments and their co-operation in construction and maintenance. The Canada Highways Act of 1913 was a recognition of the important part played in the development of the country by good roads and elicited the cooperation of all sections of the Dominion in maintaining a good road system. The bill made available \$20,000,000 available during the following five years, to be divided among the provinces on the basis of population with the expenditure of proportionate amounts by these provinces to a total of \$30,000,000.

At the present time there are 13,000 miles of main roads in the various provinces and networks of communications branching off from them to serve the rural areas. In addition to the maintenance of these, new roads are being constructed each year. These serve to join up the provincial centres, and it is now the aim of the various governments to join up the provincial systems and provide a main highway across Canada from coast to coast, an undertaking not without accomplishment and the accomplishment of which may be soon expected.

Excellent motor roads join up all the principal cities and towns and the avenues to the international borders are maintained at a fine standard. Last year half a million motor tourists into visited Canada from the United States alone, staying for various periods from one day to six months, and it is stated that the number of visitors staying for over one month has doubled within the past few years. In many cases the upkeep of such highways as Toronto-Hamilton, Ottawa-Montreal, Montreal-Quebec is paid by the tourist traffic upon the roads.

The completion this year of the roadway of the Grand Circle Motor road, running from California to the north Atlantic in the north, linking the national parks, and constituting the great scenic motor tour in the southeast, is expected to bring the Dominion to unprecedented volume of motor traffic.

The importance every section of the Canada people attach to the possession of good roads was evidenced at the

last good roads convention held in Victoria, B.C., when over from Atlantic to Pacific cabinet ministers, members of parliament, provincial and city engineers and prominent business men, from every section of the Dominion, as well as attracting representatives of many states of the Union for the purpose of a review and experience. It marked the halfway house in the progress effected since the passing of the Canada Highways Act and formed a point of retrospect as well as prospect. To date 20 agreements for Federal aid have been authorized for 5,125 miles of provincial roads at an estimated cost of \$29,615,115. The total amount of provincial expenditure audited with respect to the year is \$15,974,591, and the total amount of payments made with respect thereto is \$8,175,751. The total mileage of completed Federal aid work to the time was 1,400 miles and 2,397 miles under construction 2,397 miles.

World's Wheat Crop Increased Production In Both U.S. and Canada

The world's wheat production will be considerably greater than the year before, according to estimates made public by the United States Department of Agriculture. Actual conditions and conditions reported from reporting countries indicate a yield this year of 3,019,226,000 bushels compared with the production last year of 2,909,396,000, and the 1909-1911 average of 2,819,226,000 bushels.

Reports from all sources regarding Russian crop conditions were favorable and would feed the nation this year. The Russian crop is estimated to be 1,339,226,000 bushels compared with 1,339,226,000 bushels in 1910 and the 1909-1911 average of 1,339,226,000 bushels. In India and Japan are expected to produce 329,847,000 bushels compared with 329,847,000 bushels in 1910 and the pre-war average of 329,847,000 bushels.

Increased wheat production in both the United States and Canada was indicated by the combined estimate being 1,125,968,000 bushels this year, compared with 1,095,715,000 in 1910 and the pre-war average of 883,810,000.

Monsoon Welcome To Natives of India

Wild Rains Keep Country From Becoming Barren Desert

"I had scarcely been in India two months and I heard the monsoon discussed," writes a correspondent from Deran Lakh in the London Times. "The monsoon, which would cool the air, so I, too, began to be interested."

"The monsoon had reached Calcutta," the papers said, and we all began to calculate how long it would take to reach us. "In a fortnight it would be here," we heard. "It will be here," said one. "It will raise the exchange," added another hopefully. "The monsoon is expected," said the native agriculturist just as it watched the clouds. "It will not simply a question of cooling the air or raising the exchange with him. His crops were parched; a good harvest (rain) would bring him comfort; a bad one would bring him starvation."

"So as I rubbed past fields and crops on various rail journeys I saw him and his like working in field after field; but always with an eye on the clouds."

"The monsoon is really the fairy godmother of India, for but for its bi-annual visits, most of the country would be barren desert."

"The heat has so reduced the air pressure over India that it is as if a great gap had been torn in the sky and the clouds were the ocean, are sucked in by this gap and rush inland."

"There is a double effect, for whereas the lower clouds are content to lay upon their floods on the plains, the higher move along until they strike the Himalayas. Then their waters come pouring down the hill-sides in innumerable little torrents and finally rushing into the plains, which are swollen into mammoth lakes. The plains then get a double supply and crops spring up with new, rapid and vigorous life."

Faustly Victim the Rule
Example of the 1910-11 season in the United States showed that 69 per cent. had uncorrected, faulty vision. Of 616 employees on a typewriter company 62 per cent. were found to be in need of glasses. Among 5,000 employees in a paper-factory the percentage of those with normal sight was only twenty-eight.

Sweden Planning For Radio Station

Total Cost Will Probably Be Over Two Million

The Swedish Government has placed an order in the United States for apparatus for a high power radio station to handle direct wireless communication with Sweden (the United States and Sweden). The total cost of the station erected will probably be over \$2,000,000.

The new station will be situated in the vicinity of Goteborg, which is on the west coast of Sweden, and will be used for the installation of the 200 kilowatt Alexanderson alternator with the well-known multipoint antenna, which will reach down to the antenna a number of six hundred feet. The receiving equipment will consist of two complete and independent modern sets, composed of tuners and the necessary amplifying apparatus, and will be used in conjunction with the receiving service devised for the reduction of static disturbances.

The need of direct telegraph connection between Sweden and the western hemisphere was emphasized very strongly by the war, and it has immediately thereafter. The international conditions within the former country demanded closer relations with North America, and therefore more reliable and rapid communication facilities.

Royal Tactfulness

Late King Edward Showed Fine Quality by Close Attention

The late King Edward was noted for his tactfulness and it was said to be one of his finest qualities. An example of his tact in behavior occurred during one of his holiday trips. He had occasion to land unexpectedly at certain Italian coast, and as it had been raining heavily, the roads were very dirty. The local officials laid down a carpet from the pier to the shore, but it was not quite long enough, and the only thing which they could lay their hands on at the moment was an Italian flag, which they placed at the end of the carpet. When the King had traversed the carpet and came to the shore, he noticed the carpet and instead of walking over it, he stepped to one side and raised his hat in respect to the national emblem of the country he was in. This act at once settled the Italian doubts with enthusiasm. This incident illustrates the tactfulness and tact of the late King, who was a man of great tact and sympathy, which is the secret of all tactfulness. Tact is knowledge of human nature and everyone needs this knowledge in order to succeed in every walk of life.

"An act of winning people is a great one, and people will often do so, the little things in life reveal our tactfulness and character."

Lease Royal Ranch

To Prince of Wales

Ranching Lease in Alberta is Granted to Prince of Wales

The granting of a ranching lease to His Royal Highness the Prince of Wales, covering the property in the "Prince of Wales" ranch in Alberta has been granted in Ottawa.

The lease is issued by the Minister of the Interior, under authority from the Governor-in-Council, covering all the grazing lands at present used by His Royal Highness in his ranching operations for a term of ten years, with provision that upon its expiration a renewal thereof will be granted for another term of ten years if application is made thereafter.

The largest meteorite known in the "Cape York meteorite," brought by Dr. Peary from Greenland in 1907. It weighs 36 tons.

There may be nothing in a name, but it helps some on a bank check.

Says North Pole Easily Reached from London

Trip Could Be Made by Airplane in Few Days

Modern airplanes of the German type could make the trip from London to the North Pole, a distance of 4,000 miles, within a week, says Major Richard Byrd, a Canadian aviator, who is the Shackleton Antarctic expedition. For the entire distance he could be far from the land and he would be able to land at any point he wished, and that in future polar exploration will be done by aircraft, during the summer months. Major Byrd continues: "Very few persons realize that it is possible to reach the North Pole in a few days. The summer months really are, and the wonderful improvement in aircraft." Major Byrd made important observations of flying conditions in the Antarctic. "During the seven weeks we were in the ice," he says, "the lowest temperature recorded was five degrees Fahrenheit and the average approximately 20 degrees." The wind average was eight to 15 miles an hour, and the air and sky were wonderfully clear. So clear was the air that night was very frequent. We had more than 300 perfect flying hours.

Radio 26 Years Developing

Progress of Wireless Communication Not So Rapid As Might Be

The progress of radio has not been so fast as its last year's development would lead people to believe. In fact, it has been slower in attaining popularity than the automobile. It was 26 years ago that Marconi succeeded in sending wireless "V" for a distance of 100 yards. For years before 1914 he had been experimenting on his father's farm in Italy. One year later he signalled his father in two months increased the distance to 12 miles. In 1914, he signalled 20 miles and in 1915 his wireless messages crossed the Atlantic Ocean.

Cross-Purposes

It was a case of promise and the nervous young man, who was being severely cross-examined by counsel for his late fiancée.

"Now, am I to understand that you pressed your suit again in the autumn of 1917?" inquired counsel.

"No," was the unexpected reply. "I bought a new coat."

Record For Export

According to figures recently compiled the annual production of manufacturing industries in Canada now amounts to approximately \$400 per head of population while the export value \$100 per head, or the highest in the world.

Where Autos Are Common More than 2,500 automobiles are sold in Canada each year for each family to possess one, is the record of Ponca City, Oklahoma. The claim is made that this city has the highest number of cars per capita and has more money invested per capita in automobiles than any other city in the State. The total value of 1920 City owned cars is placed at \$7,500,000.

U.S. Bears British Nurse
Because she was born in South Africa, although she came from the United States, a British nurse, Miss Phyllis Cathleen Hosking, 18, who served in the war as a nurse, was elected to the position of nurse in New York, because the quota for South Africa was exhausted for the month of September.

Critical lunacy in England is said to be on the increase since the lunatics which were formerly full up being now almost empty.

Silos And Silage For Winter Dairying In Western Canada

Picturing Canada the World Over

Natural Resources Intelligence Branch Circulates Many Lantern Slides

"Visual instruction" has become recognized in recent years as practically a corollary of aural instruction. Not only do schools and universities apply it extensively in imparting knowledge to their students, but it has been demonstrated beyond peradventure to be one of the most popular and efficient means that lecturers and other public speakers can adopt before public audiences of any description. Pictures constitute a universal language. Whether or not an audience can understand the language spoken it can derive some conception of the meaning of the speaker by picturing by looking at well-known pictures.

During recent years the Federal Government has applied the visual method extensively in extending throughout the world a vast volume of information with respect to Canada. One of the chief methods made use of has been the projection lantern and colored lantern slides. The Natural Resources Intelligence Branch, as an authorized source of information concerning Canadian resources, circulates thousands of slides every year. While these activities are naturally confined mainly to Canada, large numbers of slides are also sent to other countries. In Great Britain, Continental Europe, Australia, New Zealand and the United States of America, a greater number of the lantern slides required by other branches of the Department of the Interior and some of the other departments as well as prepared and colored by the staff of the Natural Resources Intelligence Branch.

Major Carter made important observations of flying conditions in the Antarctic. "During the seven weeks we were in the ice," he says, "the lowest temperature recorded was five degrees Fahrenheit and the average approximately 20 degrees." The wind average was eight to 15 miles an hour, and the air and sky were wonderfully clear. So clear was the air that night was very frequent. We had more than 300 perfect flying hours.

Invents New Thresher

Machine Constructed by Brandon Man After a Recognized Success

J. H. Hathaway, of Brandon, has invented a new threshing machine, according to experts and practical farmers, will revolutionize the separator industry. Briefly, it is said to be the "Puff" of separating machines, will cost approximately \$600.

The machine is called the "Mighty Atom" and is six feet high, twelve feet long, 44 inches wide and weighs 2,000 pounds.

The invention is the result of fifteen years' work, and has been demonstrated to the local Board of Trade and well-known farmers of the district. As a result of this demonstration, it is stated, the machine is a recognized success. Already three machines have been constructed by Mr. Hathaway and a patent applied for.

Knighted by Denmark

C. Marker, Dairy Commissioner for Alberta, Receives Signal Honor

Christian Marker, Dairy Commissioner for Alberta, has been completely honored by the Danish Government, and has received well-deserved recognition in having a knighthood bestowed upon him by the Consulate-General who was visiting in the west for some time. Mr. Marker's distinction consists in a Danish order, which gives to him certain privileges in Denmark and is merely a mark of honor outside borders.

There is no more popular Government official in Canada than "Chris" Marker and no more loyal to the land of his adoption and the honor conferred upon him by his native land is equally an honor to Canada.

Canada's Finest Ship

The Empress of Scotland is considered the finest liner ship in the Canadian service, as well as the largest. She has nine decks, is 678 feet in length, and 77 feet broad, and is 25,000 tons.

She is a luxurious liner, is fitted, adapted for burning oil fuel and has a complete system of wireless telegraph fitted including a long range installation and apparatus for taking wireless bearings. Automatic signaling and electric clocks are fitted, also the modern type of gyro compass.

Japan's Unemployed

In Japan there is little evidence of unemployment even in times of business depression. Most of the industrial workers come from the rural farms into which the industry is divided, and, since they have a strong feeling that they are not to leave their country relatives as soon as they are out of work in the cities. A "strong family feeling" of that kind, it is said, is what might easily become more proud by those who have it than they do those upon whom they permit it to rest.

Toll Rates through the Panama Canal

Ship average \$1,000 per hour.

ITEMS OF LOCAL INTEREST

Sunny South council will meet in Alderson on Monday, Nov. 6th.

C.P.R. section men are busy these days putting in a new track along the spur track west of town.

Mrs. J. W. Whelan returned home this week after visiting the past few months at friends at the Pacific coast.

Miss Corbett, of the school staff, won five at prize for the best dressed lady and made up band in Medicine Hat last Friday.

Ray Brethour, of Sunderland, Ont., arrived in town this last week to visit his father, H. W. Brethour, near Harvest Vale.

At Monday, Nov. 6th, will be observed as Thanksgiving day at lower Canada. The stores in town will be closed on that day.

Keep in mind the dance in Mac's hall on Friday evening of this week under the auspices of the Y.M.C. Cool music. Everybody invited to attend.

"The Frodige Judge," one of the best pictures on the road, is showing at the Amuse-U. These on Wednesday and Thursday evenings of this week.

Bert McKim, who has been visiting his uncle, Mr. Benson, in summer, returned to Calgary yesterday to resume his studies in college.

A number of dishes which were brought to Gordon Memorial church for the annual supper have been returned for. Those bringing the more requested to call and get same.

Under provisions of the Domestic Animals Act, the Department of Agriculture is limiting the number of stock allowed to graze and run at large in unincorporated areas.

The Alberta board announces that the local government has approved of Monday, Nov. 6th, as Thanksgiving day, and calls upon all citizens of the province to observe it as such.

J. J. Follis, provincial inspector, was in town on business last week. Mr. Follis says he finds a vast improvement in the observance of the liquor law throughout the province, despite the propaganda of the contrary.

Dr. Patterson returned to town last Friday and is now located in his office over the drug store. The Dr. and Mrs. Patterson moved from Ontario to Redcliff and report a most enjoyable trip.

The Minimum Wage Board held a session in Medicine Hat last Tuesday, when evidence concerning the minimum wage for women was taken. Deputy Attorney General Browning presided.

The Equalization Board is sitting in Medicine Hat today for the purpose of hearing representations of taxpayers of the local improvement districts of the northern portion of the province in the matter of excessive taxation.

The Girls' Guild of Gordon Memorial church will hold a social evening at the church on Monday evening, Oct. 30th. The event will be in the nature of a Halliwell's social. Admission 25c and 10c. All will be welcome.

Rev. Thos. Wilson of St. John's

church, Medicine Hat, will give a lantern slide lecture in Gordon Memorial church under the auspices of the Ladies Aid, on Wednesday, Nov. 8th. Watch for further particulars.

Mrs. Sheldon, who has been in the Medicine Hat hospital, where she underwent an operation for appendicitis, returned home this week. Although a very weak Mrs. Sheldon is rapidly improving.

E. Waloff, W. Campess and W. Kutz, who have been spending a week at Crane Lake after getting married last Saturday. Although they got a few hankers their luck was no so good as on other visits.

Bank robberies continue in Canada both east and west. At St. Catharines, Ont., the Standard bank was robbed of \$10,000 and other securities. At Siding, Alta., a post office and a car were broken into and robbed.

T. W. Weston, a representative of the International Bible Society Association, will hold a service in the parlours of the Redcliff hotel here on Sunday afternoon at three o'clock. His subjects will be "The New World Begun." Those attending are asked to bring their Bibles. No collection.

P. Erickson, of the Bowell district, has brought to this week's sample of the Durum Kabokas which he grew on his farm. The year crop of this kind of wheat is well up to the mark. Mr. Erickson took a number of these to the government at Medicine Hat and it rated No. 1.

A number of new school districts throughout the province is announced in the last Alberta Gazette. The fact that the permits are also being issued for teachers shows that the province still a great shortage of teachers in the province.

The annual meeting of the Y.M.C. will be held in the club rooms on Monday evening, Nov. 6th. An some very important business is on the agenda.

"Daddy buy me one."

"What?"

"A tube of Klenzo tooth paste."

Every boy or girl who promises to clean their teeth with Klenzo gets a dandy mechanical

TOP FREE!

with a purchase of Klenzo tooth paste.

DRUGGIST, REDCLIFF

Draying & Cesspool
HARRY JOHNSON
Phone No. 8, Redcliff

for that occasion it is urgently requested that there be a full turnout of members.

At the service in Gordon Memorial church last Sunday evening, the pastor, Rev. T. S. Palm, will answer a number of questions dealing with social and religious lines. These services are proving most interesting and instructive.

The concert held in Mac's hall last Monday evening under the auspices of the Y.M.C., was well attended, and all thoroughly enjoyed the excellent programme put on by members of the same. The concert was held in Mac's hall. During the evening George Kinnaird gave an address in which he outlined the aims and objects of the Y.M.C. in the province. We understand it is the intention to organize a lodge of this society in Redcliff.

Railway News in Brief

Edmonton.—Grain is still coming into Edmonton in large quantities from towns along the line of the Edmonton, Denver & British Columbia Railway. From the Berwyn station and from a number of points, the movement has been of sufficient volume to tax the accommodations in the way of freight cars to the limit, and there is no indication that this large movement will not continue. Much grain is still being loaded in preparation for shipment.

Winnipeg.—Stimulated by special rates from Eastern Canada and the United States tourist traffic to the West will be fairly good this summer. The Canadian Pacific Railway, with headquarters in Winnipeg, is expected to see a large volume of passenger fares over the Canadian Pacific, Mr. MacPherson thinks. Special round trip to visit tickets should make their appearance about the middle of May.

Calgary.—P. L. Nalson, manager of the Department of Natural Resources of the Canadian Pacific Railway at Calgary recently visited Montreal in connection with the proposed tripping of members of the Royal R. Consulars to settle in Alberta. He is coming with this matter a meeting will be held in Montreal on the 27th inst. Amongst those who will attend this meeting are Sir Augustus Nathan, D. C. Coleman, Colonel J. T. Dennis, and Mr. George Wallace, collector, Calgary. It is expected that some decision will be reached at this meeting.

Invermere.—Mr. Conrad Klein, Alpine guide at present residing at Invermere, has received a flattering offer to join the second expedition which is being formed to ascend Mount Everest, the giant peak of the Himalayas. Before coming to this section Mr. Klein was an official guide in the Austrian Tyrol. He was brought out here by the C.P.R. as one of the qualified persons to lead a party in their climb up the peaks of the Canadian Rockies. He has climbed peaks in all parts of the world. Owing to personal reasons he is unable to accept the tempting offer which has been made to him.

St. John.—With a total of 4,650,000 bushels of grain shipped from West St. John by the C.P.R. last week, and 1,500,000 in the elevators, besides 94 carloads on the track, prospects are that the total volume of cereal exported from the West this season will not be less than 12,000,000 bushels. The grain handled last season included wheat, barley with the exception of flax and peas. A small quantity of buckwheat has been handled. Last season, to date, 6,277,297 bushels of grain were exported, and for the whole season, which lasted until June, 9,004,160 bushels were shipped.

The C.P.R. elevator crew achieved a record for February, sending out a total of 2,719,800 in the 28 days, the best output ever recorded for the second month of the year.

Vancouver.—The new Canadian Pacific liner "Empress of Australia" is expected to be placed in service early this summer. Her first trans-Pacific trip is scheduled to start from Hong Kong for Vancouver on June 28 and from Vancouver and Victoria for the Orient on July 27.

The "Empress of Australia" is practically a new ship, having been in the builder's hands at the outbreak of the war. She has lately been converted into a transport, and is similar in equipment and standard to the "Empress of Scotland." A twin-screw steamship of 10,300 gross tons, 360 feet in length, 32 feet in breadth and 41.5 feet in depth, the "Empress of Australia" will prove a notable addition to the company's Pacific fleet, which already maintains the quickest time across the Pacific with the well-known 10,500-ton liners "Empress of Russia" and "Empress of Asia." She is expected to maintain a speed of 22 knots, and will be able to accommodate 410 first class, 130 second class, 130 third class and 2,500 steerage passengers.

ALDERSON NOTES

Miss Hilda Myhre and John Hanson, a well known young couple of this district, were married in Medicine Hat on Thursday, Oct. 19th, by Rev. A. D. ... when the young couple returned from their honeymoon a reception was held at the home of the bride's parents, where a number of friends gathered to welcome them. The reception was given by Mrs. Hanson and will be held on Saturday, Nov. 4th.

of Redcliff, assisted by E. P. Blackshaw, of Medicine Hat. The church was so regrettably decorated for the occasion by the ladies of the congregation. The service throughout was fitting and impressive.

The next service will be held in this church on Nov. 19, at 8 p.m. There will be service at Suffield at 11 a.m.

MISCELLANEOUS

HOUSE FOR SALE.—Situated in Lockwood, could be easily moved. It is cheap for cash. Apply to H. Pollitt, 2222 Washington Ave., Medicine Hat.

There was a splendid attendance at St. Mary's Anglican church last Sunday for the annual Thanksgiving service conducted by Rev. C. F. Orman.

Australia will market her 1922-23 wheat crop under export of voluntary pools organized in each of the four wheat growing states, Victoria, New South Wales, South Australia, and West Australia, according to report received at Ottawa from D. H. Ross, Canadian high commissioner in Melbourne.
